

This image shows a vertical cross-section or a close-up of a textured surface. A prominent, dark, irregular vertical band runs down the center, suggesting a binding or a fold. The surrounding areas are light-colored with a grainy, speckled texture, possibly representing different materials or a weathered surface. The overall appearance is that of a scanned physical object, like a book cover or a piece of old paper.

This image shows a vertical strip of material, likely a book binding or a piece of fabric. The left edge is dark and textured, possibly showing the binding material. The right side is lighter and has a more uniform, though still textured, appearance. The overall image is high-contrast and grainy, with a vertical line of light running down the center.

This image is a high-contrast, black and white scan of a vertical strip, likely a page edge or binding. The strip is characterized by a series of light, irregular, and somewhat jagged horizontal bands against a dark, textured background. The overall appearance is grainy and noisy, typical of a low-quality scan or a heavily degraded document. The light bands vary in width and intensity, creating a stark contrast with the surrounding dark area.
